Abstract (en)

[origin: EP0258582A2] 1. Motor-operated positioning element for a centralised locking system, which element has a lock rod which is provided for the operation of a door lock, which is coupled with a knob rod or button rod, and which is movable between two end positions by means of a motor, and also an arresting device for anti-theft security, characterised in that the anti-theft security arrangement is formed of an arresting element (arresting lever 16, locking bolt 24) which blocks the button rod (13), and the button rod (13) is coupled with the lock rod (6) releasably through the action of force by means of a latching device (8, 9, 10; 28, 30, 31).
