Abstract (en)

The foot securing device for ski boots comprises a pocket-size container (1), adapted for housing batteries (2), a motor (4) and a minicompressor (6). The motor (4) is connected to the batteries (2) via an actuation switch (3) and arranged to drive, through a kinematic transmission (7, 8, 9, 10), the minicompressor (6). The minicompressor (6) has a delivery duct (13) which is releasably connectable to a valve for inflating an air chamber in a ski boot. A port (12) is provided in the container (1) for permitting an ingress of air to the minicompressor (6).
