Abstract (en)
[origin: EP0258824A2] The foot securing device comprises a cable (11) which extends partially inside a boot (1) and is guided by means of guide elements (12, 13) to act on a foot presser (10). The boot (1) has a front quarter (3) connected to a shell (2), and an upper front quarter (6) connected to an upper portion of the front quarter (3). The cable (11) extends over the upper front quarter (6) so as to act on the presser (10) according to the movement of the upper front quarter (6) with respect to the quarter (3).
