Abstract (en)
[origin: EP0258833A1] The tub has a top peripheral edge (3). In order to achieve improved utilisation of the standing surface with visually advantageous arrangements, seen in the projection of the standing surface (8) of the tub (21), the outside (7) of the edge (3) has on the front side (9) at least one set-back portion (11, 12) which deviates from a rectangle (R) surrounding the tub and extends over the entire height of the tub, due to which set-back portion the width (B1) of the tub is reduced in this region by at least 10%, preferably by at least 20%, in relation to the width of the rectangle (R). <IMAGE>
