Abstract (en)
[origin: EP0258904A1] The device for setting piles for forming a groin has a travelling mechanism (10), with an operating device (20) arranged on the travelling mechanism, with a driving device (30) arranged on the travelling mechanism and with a ramming device (60) guided in the ramming direction above the pile-aligning device (50). The travelling mechanism can travel on the heads of piles already set, a pile-feeding device (40) is arranged at the side of the travelling mechanism and a pile-aligning device (50) is arranged in front of the travelling mechanism. <IMAGE>
