Abstract (en)

[origin: US4767900A] An electric apparatus is provided with a manual control switch with indication of the "on" and "off" positions, the case of said apparatus having on a front face a pivoting manual control switch capable of occupying two endmost "on" and "off" positions, said switch being mounted on a shaft provided in the case. The switch is pierced with two openings which, by a contrast between the colors of the switch and of the underlying shaft, stand out against the shaft, one of rectilinear shape indicating "on" position and the other of circular shape indicating the "off" position.
