Abstract (en)

[origin: EP0260189A2] Seal for closing a concrete shuttering mould. It consists of a flexible longitudinal bar (1) of generally triangular cross-section enclosing a tubular cavity (10) located close to that end (9) which will come into contact with the corresponding end (9) of the opposing seal of the mould (18'). The side (6) remote from said end (9) will be engaged in a horizontal dovetail channel (13) in the seal's support (4). <IMAGE>
