Abstract (en)
[origin: WO8606582A1] An animal box (1) comprises two box walls (2, 5), a restriction with a feeding device (4) and a rear gate (8) actuatable by the animal. One of the box walls is divided in two parts (5, 6), at which the front part (6) closest to the feeding device, is arranged in angle with the second rear part (5) of the box wall, in such a way that an additional space is formed in the front part of the box and in that an front gate is arranged in this additional space, which gate is designed such that it opens out from the box after being actuated by the animal.
