Abstract (en)

[origin: US4840321A] To transfer reels (11) to supporting journals (15, 16) of a reel-changing device (12) of a packaging machine (10), the supporting journal (15) is axially displaceable. As a result, the reel can be delivered in the working plane or run-off plane without any transverse displacement and held in the receiving position, while the supporting journal (15, 16) penetrates into a central orifice (42) in the reel (11) as a result of axial displacement.

Abstract (de)

Zur Übergabe von Bobinen (11) an Tragzapfen (15, 16) einer Bobinen-Wechselvorrichtung (12) einer Verpackungsmaschine (10) ist der Tragzapfen (15) axial verschiebbar. Dadurch kann die Bobine ohne Querverschiebung in der Arbeits- bzw. Ablaufebene zugeführt und in der Aufnahme position gehalten werden, während der Tragzapfen (15, 16) durch Axialverschiebung in eine Mittenöffnung (42) der Bobine (11) eintritt.
