Abstract (en)
[origin: EP0260554A1] 1. A receptacle of cardboard or the like, for small articles in the form of a single-piece, box-like cut blank (1) able to be folded into an open state, comprising parts for the two side walls (3 and 5), the lid wall and the floor wall (2 and 4) and lateral lugs (13, 17, 25 and 32) forming the end walls of the receptacle and being arranged symmetrically on the two sides of the longitudinal axis (L) of the blank, and a closing bar (8) for connecting the one side wall (5) with the lid wall (2) having a filling opening, the lateral lugs (13, 17, 25 and 32) being connected with each other on the longitudinal edges of the blank in pairs and acute angled detent notches (23 and 37) are provided in the lateral lugs (27 and 32) of the two side walls (3 and 5), characterized in that the bottom lateral lugs (25) connected generally as far as half their breadth with the lateral lugs (17 and 32) of the side wall parts (3 and 5) of the blank (1) by a fold line (26 and 26a) have a section (28) which is folded with the inner side turned outwards about a fold line (29) running generally diagonally to the bottom side lug (25) and is connected with a zone (35a) of the adjacent lateral lug (32) and a tag (25a) connected with a section (33) of the lateral lugs (32) able to be folded about a fold line (34) running generally diagonally to the lateral lug (32).
