Abstract (en)
[origin: WO8705639A1] A process for bonding fibers comprising the steps of contacting the fibers with a particulate plastic alloy. The plastic alloy comprises a compound and a thermoplastic resin. The compound must be a crystalline organic compound, must have a melting point of 20 to 200 DEG C, must have a boiling point of 100 to 450 DEG C and must be a solvent for the resin. The mixture of the plastic alloy and the fibers are heated to melt the alloy and bind the fibers.
