Abstract (en)  
[origin: EP0263323A2] The furniture has a front partial seat surface, which is attached in its front region to a housing so as to be swivellable about an axis extending transversely relative to said housing, and a rear partial seat surface which is arranged so as to be swivellable relative to the front seat surface. A bent lever is mounted so as to be swivellable about a pivot bearing arranged below the front seat surface part. The rear end portion of the lever is constructed as a support of the rear seat surface part which is extended upwards at the back to form an integral support for the buttocks and pelvis. Attached to said lever in the region below the rear seat surface part is a rigid extension arm of the rear portion of the front seat surface part. <IMAGE>
