Abstract (en)

[origin: WO8706504A1] In a device for applying flowable substances (6) to a flat support by means of a magnetically applied coating cylinder (4), the mechanism (1, 14) producing the magnetic application force, as well as the coating cylinder (4), are arranged obliquely in relation to the vertical direction (3). A system (5) for feeding the substance (6) to be applied is provided for the coating cylinder (4).
