Abstract (en)  
[origin: EP0264857A1] It is customary for the purpose of optional combination of elongated lamp fixtures (1, 2) to form linear lighting of arbitrary length to provide the end faces of the lamp housing (3) of the elongated lamp fixtures (1, 2) with detachable cover plates (4) which can be anchored one inside another on border strips. In order in this case to realise as simple an assembly as possible, it is proposed to provide the cover plates (4) on the outside with plug-in frames (4d, 4f) which can be joined one inside another on border strips, and to provide as terminal seals for such linear lighting end caps (8) which for the purpose of engaging with the plug-in frames (4d, 4f) of the associated cover plates (4) have a corresponding plug-in frame (4d, 4f) on the inside. <IMAGE>
