Abstract (en)  
[origin: EP0265257A2] A detergent composition especially suitable for washing coloured fabrics includes a polymer mixture comprising a) an alkalimetal carboxymethyl cellulose; b) a vinylpyrrolidone polymer such as PVP with a molecular weight of 40,000; and c) a carboxylate polymer such as polyacrylate or maleic acid/acrylic acid copolymer. The compositions optionally contain a peroxyacid bleach system. Improved colour care of fabrics is obtained compared with any one or two of these polymers.
