Abstract (en)
[origin: EP0265262A1] A building foundation form work arrangment in which a plurality of boxes (1) are located on a supporting level surface and are kept apart to leave channels (4) between the boxes (1), and spacers (22) engaging respective sides of each of the corners of the boxes (1) so as to hold these in position against substantial lateral dislodgement forces when concrete is poured into the channels (4).
