Abstract (en)
[origin: EP0265355A1] A cradle (16) for supporting a cabin or a skip of a cableway with a suspension/haulage cable (10, 12) comprises fixed attachments (22, 28) having two shoes (36, 38) or wheels capable of taking charge of the cradle (16) in the event of immobilisation of the cables (10, 12) for a rescue operation. The shoes or wheels are curved upwards with a radius of curvature which prevents any excessive bending of the cable. <IMAGE>
