Abstract (en)

[origin: WO8706470A1] An antimicrobially active wet wiper and a method of making the wiper. The wet wiper has an antimicrobially active non-woven web that includes: (i) bonded fibers; (ii) a binder in an amount effective to bind the fibers; and (iii) a first antimicrobial agent that is substantive to the fibers and to the binder when the web is either wet or dry. The web is maintained in a wet condition in a liquid containing a second antimicrobial agent until use.
