Abstract (en)

[origin: EP0265577A1] A device for manually preparing small container bags for sugared almonds, widely spread in separate volutes of tulle veils (L), due to the presence of a plurality of separating discs (6) preferably transparent, with central holes (8), through which the veil-pushing piston (9) with basculating axis (10), out of one piece with the working plane, forms the housing of the sugared almonds, being closed by a small ribbon in correspondence to the squeezing area of the veils, determined by a lever mechanism (14) placed above said container (11) provided with holes.
