Abstract (en)
[origin: EP0265684A2] The absorbent domestic cleaning cloth for cleaning and/or drying household articles is to be designed in such a way that despite great absorbency, it cannot be penetrated by the absorbed moisture. This is achieved in that the domestic cleaning cloth is made up of two layers consisting of a water-proof plastic film (13) and a coating (14) applied thereto made of a highly absorbent material. A domestic cleaning cloth of this type can be used in a variety of ways in the household and prevents penetration of moisture in the direction of the water-proof plastic film (13).
