Abstract (en)
[origin: EP0266674A1] 1. Pair of hairdressers' scissors comprising two legs (1, 2) crossed substantially in the middle thereof and assembled together by a seating portion by means of a pivot (4) which delimits the cutting portions (5) from the ring shaped portions (8), which rings permit gripping of the instrument, characterized either in that a cutting edge (7) of a leg (1) forms a curved line and another leg (2) comprises a wide longitudinal slit (9) parallel to the cutting edge (7) corresponding to this leg, which slit (9) receives the lower layer of hair which ist not to be cut, or in that said longitudinal slit parallel to a cutting edge is formed with a rod (15) fixed by an end, via any appropriate means, on one of the two legs.
