Abstract (en)
[origin: EP0266783A1] 1. An ignition component part with a base body (1) for the retention of electrical connecting wires (3, 4) for an igniting bridge (7) and a capacitor connected in parallel with this, characterised in that the capacitor is formed or respectively arranged in or directly on the base body (1) itself and the igniting bridge (7) is connected directly on the capacitor.
