Abstract (en)  
[origin: EP0267523A2] Colour photographic Ag halide (AgX) material has blue-, green-and red-sensitive AgX emulsion coats contg. yellow, magenta and cyan couplers respectively on a support and is hardened with an instant hardener (I). The novelty is that at least one AgX cpd. (II). (II) is pref. present in the blue-sensitive emulsion or an adjacent coat. The blue-sensitive emulsion is nearer the substrate than all other colour-sensitive layers and (II) is present in this or a layer between this and the substrate, pref.
