Abstract (en)  
[origin: EP0268283A2] The fitting serves to support the lamp on support sections of a false ceiling. The supports are two-arm pivoted levers (22) which are rotatably mounted in bearing parts (20) fastened to the light fitting housing (11). The pivoted levers each have an arm (34) intended for resting against a support section (14), and a short arm (35) in each case. Guided in a thread (42) of the bearing part (20) that is arranged below the short arm (35) of the pivoted lever is an adjusting screw (21) that is to be aligned on this short arm and has or forms a bearing (43) for the short arm of the pivoted lever. <IMAGE>
