Abstract (en)
[origin: EP0268541A1] Modular packaging intended for packing goods with a view to protecting them during handling operations and transportation. It will be particularly applicable to the cardboard industry. The modular packaging, whose inner volume matches the dimensions of the goods enclosed, is formed by an assembly of modular elements (3) and (4) formed from a rectangular base (7) bordered by three lateral faces (8, 9 and 10). Moreover, it has means for reinforcing the lateral ends and/or means for securing the contents, permitting stacking of various similar packages.
