Abstract (en)

[origin: EP0268949A1] 1. A reflector for motor vehicles which comprises a means of attachment of the kind which comprises attaching or installing elements, which are formed in one piece with the reflector, and are arranged outside the surface of the reflector quadric, characterized in that the truncated pieces (2, 3) of the reflector quadric (1) are prolonged at the edges which form interfaces with each other by means of bars (4), the thickness of which is substantially equal to that of the truncated pieces (2, 3), and each pair of which form a corner piece (5) to support an attaching or installing element (6), which is itself formed in one piece with the reflector (1, 2, 3) and the abovementioned bars (4).
