Abstract (en)
A propulsion system for high speed vessels, comprising a propeller (7) mounted with horizontal axis on a column (6) extending downwards from the bottom of the vessel. The propeller (7), which may be a variable pitch propeller, is disposed in a pulling relationship to the column, and the propeller and the column are mounted unturnably with respect to the vessel. The column is provided with steering means, in the form of a fin (8), for steering the vessel.
