Abstract (en)

[origin: WO8707921A1] The machine for making coverings of concrete and similar products poured from a hopper (19) is characterized in that it comprises a frame (1) supporting by means of at least two rollers (3, 7) an endless sheet (8) of which the width corresponds at least to that of a distributor of the hopper (19), means for driving (12, 13) the sheet being provided in order to make its surface slide on the covering (9) progressively formed during the displacement of the frame which carries it.

Abstract (fr)

La machine pour l'exécution de chapes en béton et produits analogues déversés d'une trémie (19), caractérisée en ce qu'elle comporte un châssis (1) supportant, par au moins deux rouleaux (3, 7) une nappe sans fin (8) dont la largeur correspond au moins à celle d'un distributeur de la trémie (19), des moyens d'entraînement (12, 13) de la nappe étant prévus pour que sa surface glisse sur la chape (9) progressivement formée lors du déplacement du châssis qui la porte.
