Abstract (en)
[origin: EP0269923A2] For the air outlet, a supply air casing (1), which can be connected to a supply air system, is provided with at least one horizontally directed connecting piece (2), which opens out into one of the ends of an outlet tube (6) formed from a shell (6.1) provided with openings (6.2), the other end of which is closed by an end plate (11). The outlet tube (6) is provided with an adjusting slide (10), enclosing part of its circumference and covering the entire length of the part of the outlet tube (6) provided with openings (6.2), the adjusting slide (10) being arranged on the outlet tube (6) rotatably about the axis of the latter. <IMAGE>
