Abstract (en)

The elevated mobile workstation comprises rod-like elements (2a,2b) mutually connected so as to form a statically stable and self-supporting structure (1) downwardly provided with wheels (7a,7b). The workstation comprises an actuation rod (10) controlled from a raised workstation, a steering bar, arranged at the raised workstation, and a brake. The workstation can have both the shape of a foldable ladder and the shape of a small scaffolding.
