Abstract (en)
[origin: EP0270014A2] The shaped body (5) of the pillow has a trough (10) at its top side (2). This trough is adapted to the neck, the head and the ears of the user. The centre of the front side (3) is lowered. The shaped body is enclosed by a cover (1) of fabric or wool which covers at least the top side (2), the front side (3) and the rear side (4) of the shaped body (5). Arranged on the bottom side (6) of the shaped body is a connection strip (7) which connects the front side to the rear side of the cover and pulls the cover into the trough (10).
