Abstract (en)
[origin: EP0270096A1] Mounted on the vehicle frame of the vehicle (1) is an equipment carrier (4) for the attachment to the vehicle rear of piste maintenance equipment, which carrier (4) comprises a connecting frame (6) in the region of the rear which is in each case constructed so as to be pivotable about a vertical (7) and about a horizontal axis (8). In order to improve a vehicle (1) of the abovementioned type to the extent that the carrier (4) can be of lighter design, with maintenance expenditure nevertheless being reduced, the horizontal pivot axis (8) is arranged between the vertical pivot axis (7) and the connecting frame (6) and the vertical pivot axis (7) of the carrier (4) is arranged in the immediate vicinity of the vehicle frame. <IMAGE>
