Abstract (en)

[origin: US4877995A] An electroluminescent display device uses a photoconductive material which is of hydrogenated and carbonated amorphous silicon of formula $a\text{-Si}_x\text{C}_{1-x}$; with $1-x$ preferably between 0.05 and 0.50 and which has application to display functions.

Abstract (fr)

Dispositif d'affichage électroluminescent utilisant un matériau photoconducteur. Le matériau photoconducteur est du silicium amorphe hydrogéné et carboné de formule $a\text{-Si}_x\text{C}_{1-x}\text{:H}$ avec $1-x$ compris de préférence entre 0,05 et 0,50. Application à l'affichage.
