Abstract (en)
A chip-type fuse (1) which includes an insulating member (2), a pair of electrode members (4a, 4b) disposed on the insulating member, a conducting member (3) for electrically connecting the pair of electrode members to each other, and a protecting member (5) disposed on the insulating member for protecting the conducting member. The conducting member is deposited or printed on the insulating member. The insulating member is made rectangular so that it can be easily automatically mounted on a printed circuit board.
