Abstract (en)

[origin: EP0271209A1] An image forming apparatus includes accommodating assembly (150) for accommodating a plurality of developing devices (13) on stages arranged substantially vertically and having first driving mechanism for moving the developing devices in a substantially horizontal plane, an image formation assembly (100) for receiving selected one of the developing devices (13) moved out of the accommodating assembly (150) and for further moving it in a substantially horizontal plane, the image formation assembly (100) including systems for forming images using the developing device (13), the accommodating assembly (150) further including an opening (x) for allowing the developing device (13c) to be loaded into the accommodating assembly (150).
