Abstract (en)
[origin: EP0271451A2] A bogie for railway vehicles comprises a chassis formed by two side members (1,2) which carry bushes at their respective ends (1a, 2a) for rotatably supporting two axles (7), and by a cross member (9) which interconnects the central regions of the two side members (1,2) so as to allow relative pivoting and carries centrally a rocker entrainment member (12) for connection to the body of a railway vehicle by means of two opposing longitudinal connecting rods (13).
