Abstract (en)
[origin: EP0271835A2] A voice pattern carrying card system for applications where voice information input is prerequisite for operation. A card (1) is employed which stores therein voice patterns uttered by the processor of the card (1) and corresponding to a plurality of character information such as key label characters of a keyboard or idioms used frequently by the possessor of the card (1). In the state the card (1) is inserted in a voice input apparatus (2), the possessor of card (1) utters character information to be inputted in the form of voice. When pattern of the voice is detected, the voice pattern same as the detected one is retrieved from the card (1), whereby the character information to be inputted is transferred to a computer word processor or the like.
