Abstract (en)

[origin: EP0272189A1] This relates to one or more electrical links between two electrical devices (10A, 10B) joined together contiguously on a mounting rail (11). According to the invention, there is put into operation for this purpose a coupling connector (15) which is partially engaged beneath the housing (12) of each of the electrical devices (10A, 10B) and which carries one or more connection components (20) suitable for the electrical links to be established. Application to electrical devices with latching means on a mounting rail, and, for example, to electrical surveillance devices. <IMAGE>
