Abstract (en)

[origin: EP0272342A1] The table top or work surface consists of a plurality of blocks (1, 2, 3, 4,...), each of which is cut from a multilayer board which consists of alternating veneer layers (10, 11) with different fibre directions. Produced on the board surface is a strip pattern which is obtained by means of the alternating cross-cut edges (14) and longitudinal edges (15) of the veneer layers. The table top or work surface has an interesting coloured appearance, high impact resistance, low tendency to cracking and high dimensional stability. <IMAGE>
