Abstract (en)
This invention provides a sailcraft boom which finds particular application as a sailboard wishbone boom. The boom (24) includes a bifurcated head (38.1) which is open towards the front and extends partially around the mast (14). The head includes a knotted line coupling and a chock (40) is provided and adapted to fit within and space apart the open legs of the bifurcated head (38.1) ahead of the mast (14). The knotted line coupling comprises a loop of line (42) which extends around the chock (40) and the aft ends of the boom arm roots (38.2) of the points of securement to the loop (42), when the boom (24) is in position on the mast (14).
