Abstract (en)
[origin: EP0272718A1] Device for turning over a length (3) of flexible textile material comprising a supporting surface (1), a turn over apparatus (4), 21,22) close above said surface (1) and having an endless work surface (4,26) of textile repelling material (13), means for relative movement of support surface (1) and turn over apparatus (4,21,22) such that the surface speed of the work surface is equal to the relative horizontal displacement, and a stationary foil (10,24) lying over the top part of the work surface (4,26) starting from a pick-up plate (11,29).
