Abstract (en)
[origin: EP0273345A2] The rack has longitudinal and/or transverse beams as support elements which are hooked in and/or attached between upright rack posts, at least the longitudinal and/or the transverse beams consisting of profile rails. Auxiliary or additional beams 10, extending parallel to the longitudinal direction of the longitudinal beams 3, can be hooked onto said longitudinal beams 3 in each case and/or attached detachably at another place. These auxiliary or additional beams 10 have at least one profile portion 13, projecting sideways from the longitudinal beam 3, said profile portion 13 forming a support or holding bracket for auxiliary support elements 8, 14 of the rack, for example for bars 14. <IMAGE>
