Abstract (en)

[origin: EP0275175A2] A hand-held device for use in monitoring parameters during the processing of a film comprises means (18) for receiving input signals dependent on the values of the parameters from sensing means (7, 8, 9, 10, 11 12 and 13) which are responsive to the parameters; means (19, 21, 22, 24, 26, 28) for processing the signals; display means (31) coupled with the processing means for enabling the values of the parameters to be displayed selectively by the display means.
