Abstract (en)
[origin: EP0275315A1] This new synthetic lubricating fluid is a cyclohexyl cyclohexane carboxylate compound or its derivative and has the general formula (1) where n is an integer from 0 to 5 (better 1 to 3), m is an integer from 0 to 5 (better 1 to 3) and the sum n+m lies in the range 1 to 10, the R1 are independently hydrogen atoms or 1-8C alkyl groups, the R2 are independently hydrogen atoms or 1-3C alkyl groups. The synthetic lubricating fluid is used for traction drive devices. This synthetic lubricating fluid can be a mixture of the aforementioned cyclohexyl cyclohexane carboxylate compound or its derivative and a branched poly-alpha-olefin (1-70 wt.%, better 1-50 wt.%). The mean molecular weight of the branched poly-alpha-olefin is 500-10000 (better 900-5000).
