Abstract (en)

A method for artificial aging and bleaching of denim fabric by means of granular material and a bleaching agent, which produces a 'weathered' look. The fabric, after having been desized, washed and spun-dried, is put in a container together with a certain amount of sand mixed with a bleaching agent. The fabric and the sand with the bleach are tumbled inside the container for a pre-set length of time, until the fabric reaches the required state of aging and bleaching, following which the fabric is soaked in a bleach neutralizing bath.
