Abstract (en)  
In the coating head (100), there are two (or more) outflow valves (9, 11) which are located opposite and adjacent to one another and are directed towards one another and the outflow orifices (28) of which are essentially located respectively level with the topside and underside of a band-shaped or strip-shaped material (10), so that a flowable material, such as adhesive, glue, hot-melt adhesive or the like, can be coated onto this from both sides. <IMAGE>

Abstract (de)  
Bei dem Auftragskopf (100) sind zwei (oder mehr) benachbart gegenüberliegende, gegeneinander gerichtete Austrittsventile (9,11) vorgesehen, deren Austrittsmündungen (28) im wesentlichen in der Höhe der Oberseite bzw. der Unterseite eines band- oder streifenförmigen Gutes (10) liegen, so daß auf dieses von beiden Seiten ein fließfähiges Material wie Klebstoff, Leim, Heißschmelzkleber oder dergleichen aufgetragen werden kann.
