Abstract (en)  
A water-vapour-permeable, waterproof shoe has a shoe upper 1 to enclose the wearer's foot formed from a water-vapour-permeable, waterproof fabric, a shoe sole 3 having air permeable openings 5 therein, and a mesh or other porous layer 2 of protective material positioned between the shoe upper 1 and the shoe sole 3, the upper, mesh and sole being bonded together at least in the edge area around the mesh. The openings 5 in the sole allow the sole of the wearer to "breathe", thereby providing a more comfortable shoe.
