Abstract (en)

An arrangement in a ski binding for fastening a ski boot with a front sole extension (7) which shows less width than the remaining sole, comprising a toe iron (1) with an approximately plane mounting plate (2) having a portion (2 min) which is intended as a support of the sole extension (7), and a portion (2'') directed rearwards and intended as a support of the front portion of the wider part of the sole. The plate (2) intended as a support of the front portion of the wider part of the sole, has less width than the cooperating sole, and that at the edges of said portion of the mounting plate there are bent-up lateral edges (9,10) of less height than the thickness of the sole and intended for cooperation with grooves (23,24) in the underside of the sole.
