Abstract (en)

The sawing performance and the cutting quality of a saw blade are considerably improved when elongated slots are provided in the vicinity of the longitudinal edge (4) of the blade (1) which make the sawing pressure exerted on the abrasive segments (3) uniform during the sawing. <IMAGE>

Abstract (fr)

On améliore nettement les performances de sciage et la qualité de coupe d'une lame d'armure, lorsqu'on prévoit au voisinage du bord longitudinal (4) de la lame (1), des fentes allongées qui uniformisent la pression de sciage exercée sur les segments abrasifs (3) au cours du sciage.
