Abstract (en)  
[origin: EP0275922A2] The invention relates to a rail transport unit for the transporting of heavy loads with two multiple-axle bogies (10) and a frame, which is connected to each of the two bogies (10) via a respective connecting element having a pivot pin (24) and a pivot bearing (22). The frame is designed as a loading frame (14) of a lockable transport container (12) which accommodates the goods to be transported.
